

The Seventh International ICST Conference on Heterogeneous Networking for Quality, Reliability, Security and Robustness (QShine 2010)

Houston, Texas, USA
November 17-19, 2010
<http://www.qshine.org/>

Call for Workshop Proposals

We encourage submissions of workshop proposals on all topics associated the design and implementation of large-scale wired and wireless networks and distributed systems. The aim of this conference is to bring together researchers and practitioners to present and share the latest results in the areas of performance, configuration, cross-layer approaches, scalability, resilience and survivability of large scale heterogeneous networks and distributed systems. Current topics of interest include but not limited to the followings.

- All aspects of quality of service (QoS), reliability, security, privacy and robustness
- Emerging standards, systems, services, regulations and disruptive technologies
- Architecture, design and implementation of QoS-enabled networks and distributed systems
- Cross-layer research and optimization
- New theory, application and engineering practice
- Simulation of large and complex systems
- New perspectives in bridging other areas

Other topics of interest can be found in the Call for Paper at <http://www.qshine.org/cfp.shtml>.

Proposals should be sent to the workshops co-chairs.

Jeff Y. Li at Jeff.Li@nicta.com.au
Vojislav B. Mistic at vmistic@scs.ryerson.ca

Workshop proposals should address most of the following issues:

- Title and Acronym of workshop
- Description of topics
- Scope of the workshop
- Workshop organizer(s) and their credentials
- Format of workshop (1/2 day, 1 day)
- Intended program committee (indicate those who have agreed already)
- Highlights (e.g., keynotes, panels, journal special issue)
- Expected number of participants
- Details of any previous related workshops
- Draft call for papers

Important Dates

- Workshops Proposals due (extended): August 26, 2010
- Notification of workshop proposal Acceptance: August 30, 2010
